

In regards to giving LPFM brodcasts priority over translator services, I believe this will be very harmfull, especially to stations that depend on the broader coverage of their translator service. specifically, I have lived in a handfull of different communities throughout Oregon and it has always been Very Important to me to be able to recieve a local KLOVE station and this has never been a problem since the main stations have carried out through all the outlying communities nearby. I have know of a countless number of people who are in the same situation with they're local KLOVE station and fear that if the LPFM broadcast signals are given priority, that they will lose coverage in their area. KLOVE has made a VERY Positive difference in Numerous communities, and as a new financial supporter of KLOVE, who is 100% dependant upon listener support, this possible change is quite disstressing. Thank you for you're time and consideration,

From A concerned listener.
